First and foremost I am a servant leader with 10 years of experience building and cultivating effective and happy teams.

I am a Full Stack developer specializing in developing React and Javascript applications. My backend experience is with Python/Django with the basics of NodeJS.

For styling, all my projects utilize Bootstrap and React-strap with custom CSS.

I have experience integrating 3rd party modules for faster application development.

I also have experience creating Django REST APIs as well utilizing APIs for data integration with my applications.

For version control I use Git and Github.

SKILLS SUMMARY

•JAVASCRIPT	•GIT/GITHUB
•REACT	•AFRAME (VR)
•HTML	•CLOUDINARY
•CSS	•PYTHON
•BOOTSTRAP	•DJANGO w/ ORM
•REACTSTRAP	•DJANGO Rest
•POSTMAN	•Node

EDUCATION

Nashville Software School
Full-stack Web Development

TECHNICAL EDUCATION
Nashville Software School | Apr 2020 - present

Intensive 6-month full-stack development program building applications in team-based environments using current industry technologies.

Technology used:
- Version Control with Git and GitHub
- Built single page websites using HTML5, CSS3, JavaScript ES6, and Bootstrap
- Built function based React Apps using Hooks, styling with Reactstrap
- RESTful APIs to pull in 3rd party data as well as persist data from the application
- Built a CLI using Python with User inputs
- Built custom Django Web applications
